

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A method, comprising:
providing a pick/put to display device with an image display and an indicator light;
illuminating the indicator light to alert an operator of a service to be performed on an item at a storage location;
displaying a service instruction for the item on the image display;
displaying an image of the item on the image display;
displaying an arrow that points towards the storage location on the image display;
displaying a second arrow on the image display that points towards a second storage location for a second item; and
displaying an image of the second item at the second storage location on the image display.

Claim 2 (Canceled).

3. (Previously Presented) The method of claim 1, wherein said displaying the arrow, said displaying the service instruction and said displaying the image of the item occur at the same time.

Claim 4 (Canceled).

5. (Original) The method of claim 1, wherein said displaying the image of the item occurs after said illuminating the indicator light.

6. (Original) The method of claim 1, wherein said displaying the image of the item includes showing a moving image on the image display.

Response to Office Action
Serial No. 10/643,197
Group Art Unit 2635

7. (Original) The method of claim 6, further comprising:
wherein the pick/put to display device includes a speaker; and
playing sound from the speaker.

8. (Original) The method of claim 7, wherein said playing sound occurs during said showing the moving image.

9. (Original) The method of claim 1, wherein said displaying the image of the item includes showing a three-dimensional image on the image display.

10. (Original) The method of claim 1, wherein said illuminating the indicator light includes flashing the indicator light.

11. (Original) The method of claim 1, wherein the image includes a static picture of the item.

12. (Original) The method of claim 1, wherein the service instruction includes a pick instruction.

13. (Original) The method of claim 12, wherein the service instruction includes a quantity.

14. (Original) The method of claim 1, further comprising
wherein the pick/put to display device is operatively coupled to a server through a network; and
downloading onto the pick/put to display device a file containing the image for the item from the server.

15. (Original) The method of claim 14, further comprising:
downloading onto the pick/put to display device a sound file from the server; and
playing the sound file on a speaker of the pick/put to display device.

16. (Original) The method of claim 1, further comprising:
receiving operator input with the pick/put to display device; and
wherein said displaying on the image display the image of the item occurs in response to
said receiving operator input.

17. (Original) The method of claim 1, further comprising
wherein the pick/put to display device is operatively coupled to a server through a
network; and
receiving from the server a message concerning the item; and
wherein said displaying on the image display the image of the item occurs in response to
said receiving from the server the message.

18. (Original) A method of reducing the number of pick/put to display devices
needed for a storage area, comprising:
positioning a pick/put to display device with an image display between a first storage
location and a second storage location;
displaying on the image display a first screen that includes a first arrow pointing toward
the first storage location and a first instruction for servicing the first storage location; and
displaying on the image display a second screen that includes a second arrow pointing
toward the second storage location and a second instruction for servicing the second storage
location.

19. (Original) The method of claim 18, wherein said displaying on the image display
the first screen includes displaying a first image concerning the first storage location in the first
screen.

Serial No. 10/643,197
Group Art Unit 2635

20. (Original) The method of claim 19, wherein said displaying on the image display the second screen includes displaying a second image concerning the second storage location on the image display.

21. (Original) The method of claim 18, further comprising clearing the image display of the first screen before said displaying on the image display the second screen.

22. (Original) The method of claim 18, further comprising receiving a message from a host over a network concerning the first storage location; and wherein displaying on the image display the first screen occurs in response to said receiving the message.

Claim 23 (Canceled).

24. (Previously Presented) A system, comprising:
a pick/put to display device positioned proximal a storage location, the pick/put to display device including
a processor operable to download an instruction and an image that concern an item associated with the storage location,
memory operatively coupled to the processor,
an indicator light operatively coupled to the processor to alert an operator of a servicing task for the item at the storage location, and
an image display operatively coupled to the processor to display the instruction and the image concerning the item at the storage location;
a speaker operatively coupled to said processor; and
wherein said processor is operable to download one or more sounds concerning the item and play the sounds on the speaker.

25. (Original) The system of claim 24, further comprising:
a server operatively coupled to the processor, said server being configured to store the image and being operable to send the image to the pick/put to display device.
 26. (Original) The system of claim 25, further comprising:
a network operatively coupling the server to the processor, said network including a wireless network.
 27. (Original) The system of claim 24, wherein the memory is configured to store the image.
- Claim 28 (Canceled).
29. (Original) The system of claim 24, further comprising:
an input device operatively coupled to the processor to receive input from the operator.
 30. (Original) The system of claim 29, wherein the input device includes a microphone.
 31. (Original) The system of claim 29, wherein the input device includes one or more buttons.
 32. (Original) The system of claim 24, wherein said image display includes an organic light emitting diode display.
 33. (Original) The system of claim 24, wherein said image display is configured to display a location arrow that points to the storage location.
 34. (Original) The system of claim 33, wherein said image display is configured to display a cell indicator that identifies an individual cell within the storage location.

35. (Original) A system, comprising:
a first storage location configured to store a first item;
a second storage location configured to store a second item; and
a pick/put to display device positioned between the first storage location and the second storage location to handle service instructions for both the first storage location and the second storage location, the pick/put to display device having an image display configured to display a first arrow that points toward the first storage location and a second arrow that points to the second storage location.

36. (Previously Presented) A method, comprising:
providing a pick/put to display device with an image display and an indicator light;
illuminating the indicator light to alert an operator of a service to be performed on an item at a storage location;
displaying a service instruction for the item on the image display;
displaying an image of the item on the image display;
wherein said displaying the image of the item includes showing a moving image on the image display;
wherein the pick/put to display device includes a speaker;
playing sound from the speaker; and
wherein said playing sound occurs during said showing the moving image.

37. (Previously Presented) A method, comprising:
providing a pick/put to display device with an image display and an indicator light;
illuminating the indicator light to alert an operator of a service to be performed on an item at a storage location;
displaying a service instruction for the item on the image display;
displaying an image of the item on the image display;
wherein the pick/put to display device is operatively coupled to a server through a network; and
downloading onto the pick/put to display device a file containing the image for the item from the server.

CDS 1-2635

downloading onto the pick/put to display device a sound file from the server; and playing the sound file on a speaker of the pick/put to display device.

38. (Previously Presented) A system, comprising:
- a pick/put to display device positioned proximal a storage location, the pick/put to display device including
- a processor operable to download an instruction and an image that concern an item associated with the storage location,
 - memory operatively coupled to the processor,
 - an indicator light operatively coupled to the processor to alert an operator of a servicing task for the item at the storage location, and
 - an image display operatively coupled to the processor to display the instruction and the image concerning the item at the storage location; and
- wherein said image display is configured to display a cell indicator that identifies an individual cell within the storage location.

39. (Previously Presented) The system of claim 38, wherein said image display is configured to display a location arrow that points to the storage location.

40. (Currently amended) A method, comprising:
- storing a first file associated with a first storage location on a pick/put to display device, wherein the pick/put to display device includes an image display, wherein the pick/put to display device is positioned proximal the first storage location and a second storage location;
- storing a second file associated with the second storage location on the pick/put to display device;
- displaying on the image display of the pick/put to display device a first visual indicator that points to the first storage location;
- outputting contents of the first file associated with the first storage location with the pick/put to display device;
- displaying on the image display of the pick/put to display device a second visual indicator that points to the second storage location; and

Response to Office Action
Serial No. 10/643,197
Group Art Unit 2635

outputting contents of the second file associated with the second storage location with the pick/put to display device;

wherein said outputting contents of the first file includes displaying on the image display of the pick/put to display device first instructions concerning a first product stored at the first storage location; and

wherein said outputting contents of the second file includes displaying on the image display of the pick/put to display device second instructions concerning a second product stored at the second storage location.

41. (Previously Presented) The method of claim 40, wherein:
the first file includes a first image associated with the first storage location; and
said outputting contents of the first file includes displaying the first image on the image display of the pick/put to display device.

42. (Previously Presented) The method of claim 41, wherein:
the second file includes a second image associated with the second storage location; and
said outputting contents of the second file includes displaying the second image on the image display of the pick/put to display device.

Claim 43 (Canceled).

44. (Previously Presented) The method of claim 40, wherein:
the pick/put to display device includes a speaker;
the first file includes a first sound recording of first voice instructions associated with the first storage location; and
said outputting contents of the first file includes playing the first sound recording of the first voice instructions associated with the first storage location with the speaker of the pick/put to display device.

Response to Office Action
Serial No. 10/643,197
Group Art Unit 2635

45. (Previously Presented) The method of claim 44, wherein:
the second file includes a second sound recording of second voice instructions associated with the second storage location; and
said outputting contents of the second file includes playing the second sound recording of the second voice instructions associated with the second storage location with the speaker of the pick/put to display device.

46. (Previously Presented) The method of claim 40, further comprising:
receiving a first command related to the first storage location with the pick/put to display device; and
wherein said outputting contents of the first file occurs in response to said receiving the first command.

47. (Previously Presented) The method of claim 40, wherein the first visual indicator includes an arrow that points to the first storage location.

48. (Previously Presented) The method of claim 47, wherein the second visual indicator includes a second arrow that points to the second storage location.

49. (New) A method, comprising:
storing a first file associated with a first storage location on a pick/put to display device, wherein the pick/put to display device includes an image display, wherein the pick/put to display device is positioned proximal the first storage location and a second storage location;
storing a second file associated with the second storage location on the pick/put to display device;
displaying on the image display of the pick/put to display device a first visual indicator that points to the first storage location;
outputting contents of the first file associated with the first storage location with the pick/put to display device;
displaying on the image display of the pick/put to display device a second visual indicator that points to the second storage location;

Response to Office Action
Serial No. 10/643,197
Group Art Unit 2635

outputting contents of the second file associated with the second storage location with the pick/put to display device;

wherein the pick/put to display device includes a speaker;

wherein the first file includes a first sound recording of first voice instructions associated with the first storage location;

wherein said outputting contents of the first file includes playing the first sound recording of the first voice instructions associated with the first storage location with the speaker of the pick/put to display device;

wherein the second file includes a second sound recording of second voice instructions associated with the second storage location; and

wherein said outputting contents of the second file includes playing the second sound recording of the second voice instructions associated with the second storage location with the speaker of the pick/put to display device.

50. (New) The method of claim 49, wherein:

the first file further includes a first image associated with the first storage location;

said outputting contents of the first file further includes displaying the first image on the image display of the pick/put to display device;

the second file further includes a second image associated with the second storage location;

said outputting contents of the second file further includes displaying the second image on the image display of the pick/put to display device;

the first visual indicator includes a first arrow that points to the first storage location; and

the second visual indicator includes a second arrow that points to the second storage location.

51. (New) The method of claim 50, further comprising:

receiving a first command related to the first storage location with the pick/put to display device; and

wherein said outputting contents of the first file occurs in response to said receiving the first command.
